

Project Executable Files

Date	29 September 2026
Team ID	6ab3e6756603573ccfb3b891
Project Name	FitBuddy - AI Fitness Plan Generator Using Gemini Models
Maximum Marks	3 Marks

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)	Remarks
1	Complete source code	Yes	Entire TN-Skills project folder included.
2	README / Setup Guide	Yes	Updated README at project root.
3	requirements.txt	Yes	Dependency file included.
4	Database schema / seed files	Yes / NA	SQLAlchemy models define users and plans; DB is created on startup.
5	.env.example	Yes	Safe placeholder configuration included.
6	Deployed application URL	No	Current submission documents local Uvicorn use.
7	APK / binary	NA	Web application.
8	Dockerfile	NA	Not included in current version.
9	Test files and results	Yes	tests/test_app.py plus testing PDF.
10	Demo video / walkthrough	Yes	Uploaded FitBuddy_Demo_Video.mp4 included.

Step 2: File / Folder Structure

TN-Skills-main/

app/ - main.py, config.py, database.py, routes.py, schemas.py, ai/ gemini_client.py, gemini_generator.py, gemini_flash_generator.py, updated_plan.py
 templates/ - base.html, index.html, result.html, all_users.html, error.html
 static/ - style.css, fitnessmachi.png
 tests/ - test_app.py
 requirements.txt, run.py, start.bat, start.sh, .env.example, README.md, documentation.docx

Submission Documentation/ - eight project phases, supporting PDFs, demo evidence frames and FitBuddy_Demo_Video.mp4

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not provided; local access is http://127.0.0.1:8000
Login Credentials	NA - current version has no authentication.
Platform / Hosting Provider	Local Uvicorn development server.
Repository Link	https://github.com/simson26/TN-Skills
Demo Video Link	https://drive.google.com/file/d/1tvasdSJQP6KfQRbYd4pb-UOmAHY0tTqH/view?usp=drivesdk

Step 4: Run Instructions

1. Install Python. 2. Create and activate a virtual environment. 3. Run `pip install -r requirements.txt`. 4. Copy `.env.example` to `.env` and add GEMINI_API_KEY for live AI responses. 5. Run `python run.py`. 6. Open the home page at <http://127.0.0.1:8000>. 7. Use /docs for API documentation and /view-all-users for the stored-user view.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	No authentication / role-based access in current version	Treat admin page as a development feature; add authentication in future.
2	Gemini generation depends on external API and network	Use demo mode without a key for UI/database testing; use a valid key for live generation.
3	SQLite is intended for small local use	Migrate to a managed relational database when scaling.
